CONTENTS

PREFACE 5

ANNIVERSARIES

Albena Vassileva, Nikolai Nikolov. Fifty spring conferences of the Union of Bulgarian Mathematicians – the tradition continues 9

Petar Kenderov. Seventieth anniversary of Professor Vesselin Stoyanov Drensky 23

Nedyu Popivanov, Nikolay Kutev. Academician Popivanov at the age of 75 – a life between mathematics and Dostoevsky 32

Peter Popivanov. 90th anniversary of Prof. Racho Denchev 39

PLENARY TALKS

Vladimir Georgiev. Evolution flow and ground states for fractional Schrödinger–Hartree equations 45

Ludmil Katzarkov. Stability conditions and spectra 55

INVITED TALKS

Galia Angelova, Maria Nisheva-Pavlova, Avram Eskenazi, Krassimira Ivanova. Role of education and research for artificial intelligence development in Bulgaria until 2030 71

Emanouil Atanassov. Deterministic algorithm for optimising the direction numbers of the Sobol sequence 83

Peter Danchev, Esther García, Miguel Gómez Lozano. On some special matrix decompositions over fields and finite commutative rings 95

Sevdzhan Hakkaev. Hamilton's instability index and applications to periodic waves 102

Krassimir Manev. 50 year since publishing Cook's theorem 111

Eliza Stefanova, Krassen Stefanov. From the turtle to the python: the education of teachers of informatics and it and the curriculum changes 123

Ivan Tonov. Mathematics education of teachers – an old and still open question 133

SECTION A: MATHEMATICAL STRUCTURES

Lyubomir Borissov. On the distinctness of some ternary Kloosterman sums .. 139

Peter Rashkov. Stability analysis of a model for a vector-borne disease with an asymptomatic class 144

Turhan Syuleymanov. Linear stability of periodic waves of the coupled nonlinear wave equations 150

Gergana Tcvetkova. On symmetric positive solutions of p-Laplacian differential equations with variable coefficients 156

Tatyana L. Todorova. Lagrange's four square theorem with almost-prime numbers having a special form 163

SECTION B: MATHEMATICAL MODELLING AND INFORMATICS

Kosto V. Mitov. A limit theorem for the maximum of random variables with logarithmic distribution 179

Milena Petrova, Philip Petrov. A new method for manual measurements of inhibition zones with the Bauer-Kirby disk susceptibility test 185

Valentina Petrova. A decision hierarchical model of cyber security risk assessment 191

Ivaylo Staribratov. Some notes on the solutions of transportation problems ... 196

SECTION C: EDUCATION IN MATHEMATICS AND INFORMATICS

Nadezhda Aplakova. Bridging the gap between school and competitive mathematics: an example 203

Veselina Jecheva, Evgeniya Nikolova. Information security awareness level evaluation among Bulgarian public and local administration employees .. 209

Mariya Monova-Zheleva, Yanislav Zhelev, Evgeniya Nikolova. Fostering technology-enhanced learning and digital innovations in schools – key factors and challenges 215

Dobrinka Boykina. About understanding in mathematics education 222

Penka Georgieva, Sonya Dimova. Distance learning in 2020 – from the first line: the experience of an elite high school 231

Penka Georgieva, Evgeniya Nikolova. Developing communication competencies through university courses in mathematics 238

Todorka Glushkova, Veneta Tabakova-Komsalova. Some aspects for the application of artificial intelligence in school education 245

Tsvetelina Zhelyazkova, Dobrinka Boykina. Using a heuristic approach in maths education in 6.–7. grade 252

Lilyana Karakasheva, Antoaneta Kovacheva. The educational potential of crossword puzzles in mathematics education 261

Manya Maneva. Mathematical literacy and literacy in mathematics 267

Julia Ninova, Slavi Kadiev. Didactic technology for compiling a didactic system of problems 271

George Pashev, Rositsa Doneva, Silvia Gaftandzhieva. An application of accumulative frame models in programming training 284

Elitsa V. Peltekova, Eliza P. Stefanova. Integration of virtual reality in educational process 290

Petko Petkov, Mihail Konstantinov. Using The Weyr form in the numerical determination of the jordan canonical form of a matrix 298

Stefana Petrova. Overlap of the mathematical key competence with other competences 308

Evgenia Sendova. Once again about the quality of education in the digital era: a tribute to Blagovest Sendov 314

Neli Todorova, Desislava Krasteva. Computer modeling in support of mathematic in the initial stage 331

Vera Shopova. Interactivity – the key to successful education 337

MINISIMPOSIUM

Julian Revalski, Mladen Savov. Recent developments in modeling COVID-19 pandemic 345

PROJECTS OF EUROPEAN AND NATIONAL SIGNIFICANCE

Toni Chehlarova, Krassimira Ivanova, Petar Kenderov, Evgenia Sendova. IMI–BAS as a catalyst for the Scientix support to the Bulgarian STEM teachers 349

Neli Dimitrova, Peter Boyvalenkov, Petia Dineva, Tsviatko Rangelov, Petar Rashkov, Venelin Todorov. Computer and mathematical modelling in the national scientific programme "Information and communication technologies for a single digital market in science, education and security" 356

Pavlin Petkov, Sevdalina Georgieva, Elena Koleva. Mathematics in an electronic environment with Geogebra Activity – MϾGA 373
