# CONTENTS

PREFACE ..... 5

**ANNIVERSARIES**

*Nadezhda Ribarska.* Academician Kenderov is turning 80 ..... 9

*Peter Popivanov.* 400th Anniversary of Blaise Pascal ..... 16

*Nikolay M. Yanev.* A. N. Kolmogorov – 120th Anniversary ..... 25

**PLENARY TALKS**

*Mladen Savov.* Recent developments in anomalous diffusions ..... 39

*Nikolay M. Nikolov.* Quantum computing beyond applied linear algebra ..... 50

**INVITED TALKS**

*Danila Cherkashin.* On small non-uniform hypergraphs without property B .. 71

*Ivo M. Michailov.* Contemporary Galois theory and its classical problems .... 76

*Ivan Ganchev.* In pursuit of horizontality in the development of IoT platforms 88

*Philip Petrov, Julia Ninova.* In memoriam of prof. Ivan Gantchev Donev ..... 101

**SECTION C: EDUCATION IN MATHEMATICS AND INFORMATICS**

*Tsvetelin Andreev.* Bloom with a BLOOM (a computer model of a loom) .... 137

*Boyko Bantchev.* From construction to computation to symbolic calculation: an example in plane geometry ..... 148

*Evgeniya Vetseva.* A problem-based approach in teaching progressions ..... 154

*Desislava Georgieva.* Theory of probability and combinatorics in the school course of mathematics ..... 166

*Desislava Georgieva.* Methodological developments for the introduction of basic concepts from combinatorics ..... 172

*Vesselin Drensky.* A journey to Binomia ..... 180

*Silvena M. Stefanova-Milanova.* How learning in an electronic environment affected bilingual children in mathematics and informatics ..... 192

*Daniela Tsvetkova.* A lesson on applying the scalar product of two vectors .... 198

**SEMINAR-DISCUSSION**

*Galina Momcheva.* Student Training for Professional Occupation "Artificial Intelligence Programming" ..... 205

**PROFESSIONAL DEVELOPMENT COURSES FOR TEACHERS**

*Maroussia Slavtchova-Bojkova, Denitsa Grigorova, Emil Kamenov.* Statistical data analysis and computer visualization ..... 209

*Neven Boyanov, Sofia Boyanova.* Practical training with STEM methodology – programming, mathematics and physics in one ..... 212

*Yavor Papazov.* ABIES – an easy introduction to professional programming .. 214

*Evgenia Sendova, Tsvetelin Andreev.* Inquiry-based learning in mathematics and computer modeling through block programming ..... 217

*Stanimir Stoyanov, Veneta Tabakova-Komsalova.* Artificial Intelligence – Logic Programming with Prolog ..... 221
