

CONTENTS

PREFACE	5
---------------	---

INVITED TALKS

<i>Mikhail I. Krastanov, Nadezhda K. Ribarska.</i> Lagrange multipliers in dynamic optimization	9
<i>Petia Koprinkova-Hristova.</i> Brain-inspired models and their applications	18
<i>Kiril Bankov.</i> The place of mathematics education in the world sciences	25

SECTION A: MATHEMATICAL STRUCTURES

<i>Cvetelina Dinkova, Radostina Encheva, Aynur Ali.</i> One parametric representation of the generalized focal curve of a non-helical spherical curve	39
<i>Teodora Zapryanova, Diko Souroujon.</i> On a problem from the book “Approximation of functions” by G. G. Lorentz	46
<i>Pavlina K. Jordanova.</i> Probabilities for asymmetric p -outside values	51

SECTION B: MATHEMATICAL MODELING AND INFORMATICS

<i>Elitsa Atanasova.</i> Ways to introduce optimization algorithms and mathematical modeling in the school mathematics course	63
<i>Vitali Atias, Angel Georgiev, Vladimir Valkanov.</i> Revolutionizing Peer-to-Peer Energy Trading with Blockchain Technology	69
<i>Todor Branzov, Tsvetelin Zaeovski.</i> Functional model of PROs data collection system	78
<i>Lilyana Rusenova, Elena Somova.</i> Cloud-based corporate training model based on BPMN business process diagrams	84
<i>Valentin Chochev, Svilena Arabadzhieva.</i> Numerical study of the hazardous factors of a fire in a passenger railway car	91

SECTION C: EDUCATION IN MATHEMATICS AND INFORMATICS

<i>Daniel Denev.</i> Training on Hamming code with the help of didactic tools – methodological and historical aspects.....	103
<i>Ivaylo Dimitrov, Mehmed Kodzha.</i> A method for solving extremal problems in plane geometry	109
<i>Dilyana Dimitrova.</i> Evaluating the effectiveness of practical exercises in cryptography and authentication courses of cybersecurity education	118
<i>Slavi Kadiev.</i> An overview and analysis of literature on mechanical methods for problem creation	125
<i>Dragomir Marchev, Albena Ivanova-Nedelcheva, Nataliya Pavlova.</i> Opportunities of the astronomical observatory at the astronomical center of University of Shumen for steam education.....	143
<i>Sevinch Mustan.</i> Application of project-based learning with gamification using STEM cards	150
<i>Julia Ninova.</i> Application of composition of dilations and dilation from point (Boutin’s theorems).....	158
<i>Lyuba Petrova, Nataliya Pavlova.</i> Formation of metacognitive competences through creating games	167
<i>Irena A. Parvanova, Vencislav D. Radulov.</i> Circumsphere and Insphere of a Polyhedron	173
<i>Penka Rangelova, Marta Teofilova, Daniela Georgieva.</i> Conic sections in geometric loci problems in mathematics profiled training	180
<i>Toni Chehlarova, Georgi Gachev.</i> Computer models for the study of pyramids with equal edges inscribed in a sphere.....	192

IN MEMORIAM

<i>Petar Kenderov, Evgenia Sendova.</i> Raytcho Lazarov – mathematician, inspirer of future generations of mathematicians, a Man with a Capital “M” (1943 – 2024)	201
<i>Azniv Kasparian, Konstantin Tabakov.</i> Keropé Tchakerian (1944 – 2012).....	213

ANNIVERSARIES

<i>Konstantin Delchev.</i> Jenny Sendova – an ongoing mathematical suite	225
